Membership General Assembly

IT'S NOT EVERY DAY THAT YOU HAVE THE CHANCE TO JOIN SOMETHING THAT WILL CHANGE THE WORLD.

Welcome to the Velocity Network Foundation® 2022 Membership General Assembly.

Earlier this year, we launched Velocity Network™ Mainnet, a game-changing, blockchain-based, decentralized utility layer that replaces the outdated, fragmented way talent represents its career reputation across the labor market. The Network is a public utility governed by the Velocity Network Foundation®, that aligns incentives and redistributes value between all participants in the labor market.

The General Assembly brings together leaders from across our membership to discuss innovation and key architectural issues, share best practices, and collaborate on addressing market needs to accelerate the adoption of Velocity Network™.

Eye-Opening Sessions and Workshops

With multiple sessions to choose from, the event is packed with original content, forward-looking strategies, and tactical advice.

Form New Partnerships

Take full advantage of the opportunity to grow your network and foster relationships with member delegates, from HCM system vendors, gig platforms, staffing and RPO vendors, background and certification processors, and education vendors.

Join us as we move to change the world of work!

Dror Gurevich
CEO
Velocity Network Foundation®

Sessions

Whether you favor deep technical dives and rapid-fire info sessions, you can't wait to hear from thought leaders on the main stage or are eager to roll up your sleeves for hands-on learning, you'll find the sessions to fit your interest.

Labor Market's Defining Moment Is Now!

Join keynotes and panel discussions from thought leaders, future thinkers, and special guests on how Velocity Network™ will unleash the full potential of the job market: building pathways from education to jobs, facilitating open talent markets, improving equity and diversity, and empowering the workforce through privacy and agency over their data.

Deep Dives: Rewiring the World-of-Work

These sessions are packed with product and technical content and tactical advice. Dive deep into Velocity Network™ protocols and tech stack, payment and rewards, data schemas, and compliance. Discover the know-how and resources you need to build best-in-class credential issuing and verification experience for your users.

Trailblazers Stage: Members Showcasing Solutions Developed on Velocity Network

Presentations from the leaders of the pack, demonstrating cutting-edge solutions and services that use Velocity Network™ to unleash the power of verifiable credentials across the labor market.

Changing 1 Billion Lives by 2030 Through a Reskilling Revolution, Requires an Infrastructure for Verifiable Career Credentials

Hear from the people and organizations that work to impact 1 billion lives in the next decade, and the critical role Velocity Network™ can play in this revolution.

Global Adoption Round-Up

Discover industries and geographies already deploying solutions based on Velocity Network™ as they present their journey. Find opportunities to engage and connect to the work these early adopters are doing.

Building a Wallet? Start Here

Discover the tools and resources for wallet developers. Hear from vendors offering development services or white-label options that can accelerate your journey.

Hear from Thought Leaders

Disruptors, future-thinkers, industry experts, book authors, strategic advisors and business leaders.
