New York, NY

Together: Building the Internet of Careers®

Welcome!

A yellow industrial robot arm, labeled 'PANUC Robot M-10iD12', is positioned in a factory setting. The robot is reaching towards a grey plastic crate on a conveyor belt. The crate is filled with various packaged goods, including boxes of cereal and bags of snacks. The background shows a complex industrial environment with metal structures and machinery.

Labor Market's Defining Moment Is Now!

The Global Skills Gap

3 of every 4 (75%) companies have reported talent shortages and difficulty hiring – a 16-year high.

Source: Manpower

Job Market Polarization

By 2025, 85 million medium-wage jobs may be displaced by the shift in the division of labour between humans and machines and algorithms. More jobs – 97 million – may emerge and they will be divided between high-wage and low-wage job categories

Source: World Economic Forum

Deepened Inequalities

If your father is in the bottom earnings quartile in the U.S. you have 5 times less chance to be in the top earnings quartile than if he was on the top earnings quartile

Source: OECD

The Rising Tide of Non-Standard Employment

40% of companies in developing and transition countries and 23% in developed countries use non-standard employment

Source: International Labour Organization

Employment Redefined

Currently at 59 million and counting;
freelancing is poised to become the
U.S. majority workforce by 2027

Source: "Freelancing in America" study, Upwork

The Age of Mass Migration

The current global estimate is that there were around 300 million international migrants in the world last year, more than at any point in human history

Source: United Nations

The background of the slide is an aerial night photograph of a city, likely New York City, showing a dense grid of illuminated buildings and streets. A river, possibly the Hudson River, is visible on the right side of the image, with a bridge crossing it. The sky is dark with some light clouds near the horizon.

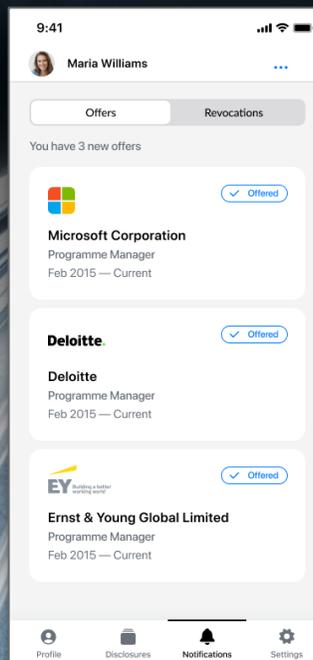

The lack of a trusted data layer is the one impediment for innovation in the job market

Together: building the Internet of Careers[®]

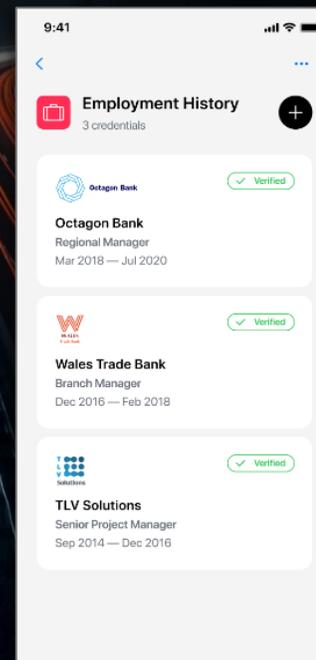

Enabling a rich verifiable self-sovereign career identity is the 'Great Transformer' of the global labor market we've been waiting for.

It will radically change the way people navigate their career and livelihood, and how employers make talent decisions, and enable the true digital transformation of the job market.

The Secret Sauce

A public, decentralized network, controlled and governed by its participants. Its decentralized nature eliminates the risk for participants associated with platform lock-in and will drive adoption at scale as well as get the support of governments and regulators.

#context_worth_mentioning

The emergence of distributed ledger technologies made it possible to build and run decentralized networks that are controlled and governed by their members that will be sharing its value. Cryptographic tokens are the new way of providing incentives for the creation of open protocols and for governing their evolution.

Blockchain is no longer just about bitcoin or cryptocurrencies in general. Instead, it can be seen as a disruptive, revolutionary technology which will have major impacts on multiple aspects of our lives. The revolutionary power of such technology compares with the revolution sparked by the World Wide Web and the Internet in general. Just as the Internet is a means of sharing information, so blockchain technologies can be seen as a way to introduce the next level: sharing value.
