

*This storyboard depicts a future of: recruiting and onboarding, license renewal, and internal mobility using Verifiable Digital Credentials empowered by Velocity...*

## The Story of Vanessa Lin

Vanessa Lin is 32 years old and a BSN graduate of her State University's College of Nursing. She has been working for 3 years as a RN.

Vanessa has a Velocity wallet with her identity and her BSN degree as verifiable credentials and the rest of her resume as self-reported credentials.

Vanessa visits a career site and searches for RN opportunities in her State. She finds the Medical Surgical Neuro Registered Nurse opportunity at a local Medical Center.

1

The recruiter performs a digital verification of Vanessa's verifiable credentials. The recruiter receives immediate feedback from the Velocity blockchain if each credential is verified, not verified, or revoked.

2

Vanessa passes all recruiting steps, is made an offer, and is sent to a background screening process. Vanessa shares her credentials from her wallet with the Background Screening Company.

3

The Background Screening Company verifies verifiable credentials digitally and immediately on the Velocity Network, and continues to perform existing verification process of Vanessa's non-verifiable, non-digital credentials.

4

Vanessa is made an offer and accepts the new job!

5

Upon completing the background screening process, the Background Check Company offers Vanessa her State RN License and BLS Certification issued from the American Heart Association (AHA) as verifiable digital credentials. Vanessa accepts this offer, and these credentials are stored in her wallet.

6

Vanessa completes a 30-hour CE program in Neurology Nursing. Upon completion, her new company offers Vanessa evidence of her learning achievement as a verifiable credential. Vanessa accepts this offer, and these credentials are stored in her wallet.

When Vanessa's license is about to expire, the wallet reminds her. She submits her CE learning credential to the State Nurse Portal as part of the renewal process.

7

8

Once the license renewal process is complete, the State Board of Nursing offers Vanessa her State RN license as a verifiable credential.

Vanessa shares her renewed State RN License with her employer automatically

9

License monitoring done via background check services

10

After a year in her role Vanessa decides to invest in her development and takes a NIS Stroke Certification program from AHA and receives an NIHSS Certification as a verifiable credential.

After two years in her role, Vanessa decides to move to a new State. In order to get her New State RN license, she completes her licensure by endorsement process and shares her Former State RN License and her BSN Degree.

11

12

Once the license by endorsement process is complete, the New State Board of Registered Nurses offers Vanessa her New State RN license as a verifiable credential.

Vanessa searches for a role in her New State on the Company's internal job site. She finds a Neuroscience Intensive Care Unit nurse position at Good Samaritan Hospital in her New State. She applies for the position and shares her New State RN license and NIHSS Certification.

13

Vanessa is accepted to the new role and is sent through a background screening process. Vanessa shares her credentials from her wallet.
