velocity

Batch-Issued Badges

Needs to be tested on both Testnet and Mainnet

Create Offers

Create offers for a few internal individuals via a batch issuing script.
Verify that the QR code and deep link were created.

Send an Email

Send an email with a link to download the app and the generated deep link and QR code to a few different email domains (including Gmail). Verify that all users got the email and all links and QR codes worked when clicked/scanned

Click & Download

Click on the links and download the app (both iOS and Android).
Verify that the apps are downloaded

Claim the Credential

Follow the process to claim the email identity credential and then claim the issued credential (test both the deep link and QR code).
Verify that the badge is correctly added to the wallet *and* verify that the badge is showing correctly in the wallet (all fields).
