# Make education and career records easy to verify, and impossible to fake

Velocity Network™ is a global non-profit initiative, driven by the largest and most influential organizations in the space of work and education, setting out to put people back in control over their career records and build a globally accessible, open source, trustworthy Internet of Careers®.

It's a public, purpose-built protocol and global blockchain network, allowing individuals to claim and own their verifiable career and education credentials, and share them with whomever they decide, allowing them to access better career opportunities. A utility layer controlled by no single entity, but that anyone can use.

The Network is public, user-owned, aligns incentives, and redistributes value between all participants in the labor market.

Velocity Network™ is governed by its members through the Velocity Network Foundation®, a global nonprofit, driven by the largest and most influential organizations in the space of work and education, set out to empower people with a globally accessible, trustworthy, Career Identity.

This approach ensures transparency and inclusivity, fostering a collaborative and sustainable environment for all stakeholders.

Join us. It's not every day that you have the chance to be among the first to join something that will change the world.
